

# **A.D.P.<sup>®</sup> from Biotics Research**

## **Standardized, Micro-Emulsified, Sustained Release Oregano Oil**

---

### **Description – Natural Antibiotic with Only Good Side-Effects**

**A.D.P.<sup>®</sup>** stands for **Anti-Dysbiosis Product** because oil from the perennial herb oregano provides biologically active compounds (like carvacrol and thymol), which are clinically well known for their potent *antimicrobial* activity in gastrointestinal *dysbiosis* (bad bugs outnumber good bugs) by adversely affecting microbial reproduction. The aromatic oil of oregano, derived from both its leaves and flowers, has been proven therapeutically effective for clinically challenging conditions such as toxic bowel, candida, intestinal parasites, yeast/fungal overgrowth, and upper respiratory bacterial or viral infections.

*Standardized* means that **A.D.P.<sup>®</sup>** is guaranteed to deliver the industry's recognized standard of oregano's active constituents (a minimum of 70%). *Micro-emulsified* means that the oil has been molecularly downsized to greatly facilitate absorption and utilization. *Sustained release* means that the emulsified oil will be more effectively absorbed by both the small *and* large intestines for a more efficacious clinical outcome.

### **Health Benefits – Enhanced Immunity against All Kinds of Bad Bugs**

While oral consumption of oregano oil is often claimed to help with digestive and oral issues, its principal benefit is associated with enhanced immune function as follows:

- May alleviate many bacterial and viral diseases by killing off their pathogens
- May inhibit or kill off many common detrimental bacteria like staph and E.coli
- May alleviate or accelerate recovery from the common cold especially at onset
- May inhibit or kill off many strains of common fungi, e.g., candida albicans
- May counteract several types of detrimental protozoa, e.g., giardia lamblia
- May kill intestinal parasites and destroy viral membranes, e.g., herpes simplex

### **Dosage – You Can Take a Lot or a Little Depending upon Your Condition**

The normal therapeutic dosage of oregano oil is 450 to 1,350 mg daily. At only 50 mg per tablet, therefore, **A.D.P.<sup>®</sup>** can be taken fairly frequently depending upon the nature of the problem. For serious dysbiosis clinicians often recommend taking 5 tablets three times daily before meals for 21 days with the addition of probiotics (like BioDophilus-FOS™ or Lactozyme™) after 14 days of therapy. For the not uncommon sore throat it is sometimes suggested that the client crush two tablets in pure water together with two drops of vitamin D (Bio-D-Mulsion™) and gargle once or twice daily. The product is not recommended in pregnancy or lactation. **A.D.P.<sup>®</sup>** can be very good for thee!
